Facilities	The accommodation for the workshop was very good				XXXX XX	XX
	The computing and presentation equipment for the workshop was excellent			X	XXXX	XXX
	The workshop was very well organised			XX	XXXX XX	
Presentations	The presentations were engaging and very well presented			XXX	XXXX	X
	The presentations were scientifically interesting			XX	XXXX X	X
	The presentations were at an appropriate academic level			X	XXXX XX	X
Hands-on sessions	The hands-on sessions were clearly introduced		X		XXXX X	XX
	The hands-on sessions gave useful practice			XX	XXX	XXX
Overall	I want to learn more about the software		X	X	XXXX XX	
	I will find the software very useful in the future		X	XXXX XX		X

The best aspect of the workshop was:

hand-on sessions. Introduction to this software and uses.

The combination between lectures/hands-on sessions.

Getting acquaintances with visualisation of models.

The workshop could have been improved in the following way:

overview presentation on general aspects of permeability – to get everyone up to the same starting point.

Clearer / larger projection of presentation.

For this diverse audience, maybe some more basic preamble on fluid flow terminology and techniques.

It was destined for more specialized students than me. Too little geology and application possibilities . I am not a specialist and I am not going deeper in this matter in my work.

Other comments:

enjoyable introduction
